

Season 1 Episode 7

The Ivan Most Likely To

Ivan is at his high school and he is at the office of Principal Figoni. Principal Figoni said, "Look Ivan, your marks are slipping and your spelling, math, and social skills are atrocious. I often wonder why they let you go into high school. With skills like these, I think you should have stayed in grade school or maybe even kindergarten." Ivan said, "I did the assignments as asked and I followed the instructions listed." Figoni said, "You submitted an abstract writing assignment and you just discuss the bland and cruelty of the universe. What kind of assignment is that?" Ivan said, "If you knew what I knew, it would make perfect sense." Figoni said, "I don't know what this means and no one knows what any of it means. I don't think you belong in this high school. I don't think you have a future ahead for yourself. You have no friends and not even a girlfriend. Everyone in high school has had a girlfriend at least once. I don't think you belong at this school. Starting tomorrow, you are going back to elementary school and you will be a student in the fifth grade." Figoni types and alters Ivan's educational information on a computer. Ivan picks up the monitor and he smashes it into the wall. Ivan picks up the tower computer and he smashes it into a window and the computer shatters and the window is completely in tact. Figoni jumps on Ivan and he pins Ivan down. Figoni said, "I also think we need to supervise everything you do even if it is outside of school."

Ivan is on a leash being walked home by Figoni's men. They walk down a street near alleyways between buildings. Ivan uses his strength and he pulls and he tries to break free but he doesn't and gets pulled back. The guard said, "Don't get smart with us. Don't you think you can escape." Ivan tries harder and he grabs onto a metal pipe on the side of a building. Ivan gets a tight grip on the metal pipe. The guard tries to pull Ivan and Ivan still has a tight grip on the pipe. The guard pulls hard again and the pipe comes down with Ivan and the pipe smashes into the guard's head. Ivan takes a taser off the guard and he tases the other guards. Ivan runs into the back alley. Ivan cuts one corner and then another. Ivan looks around and he said, "I am alone. I think I lost them. Where am I?" Ivan looks around the dark alley and he sees some science people with a giant portal. Ivan comes across them. He sees they transport all sorts of bizarre gadgets through the portal. Ivan goes to them and Ivan said, "What is this?" One of the science people said, "This is an interuniversal portal. It is how we got to your universe from ours." Ivan said, "There are other universes?" The science worker said, "Oh, there are tons of other universes out there that are waiting to be subjugated I mean

explored. We are always hiring new recruits of all calibers. Does your life suck and do you want something different?" Ivan said, "Of course I do." The science worker said, "Then what are you waiting for? This is an incredible opportunity that no one else will ever get." Ivan jumps in the portal.

A group of Monks are in the Monk headquarters and Master Augi stands at the center of them. Master Augi said, "As Ultraverse Monks, it is our responsibility to serve and protect the universes of this vast Ultraverse from interdimensional and interuniversal threats. We have just received a distress call from a universe in the decadent sector. This world is based around the decadent 1940's. I say based because it looks like the 1940's but they have unrealistic technology that does not exist in real life. They have called us for help because an army from a universe known as, 'The Dark Universe' has invaded this universe. They have their army surrounding all the docks and entry points to the mainland. It is up to us Monks to go there and run these people from this dark evil empire out of this universe." Ivan, Safron, and Dirk get suited up.

Ivan, Safron, Dirk, and a bunch of other monks get thrown in the brightly lit streets of the decca city at night. Large robots with asterisks carved in their chests patrol the streets and they aim their weapons at anything that moves. Civilians hide around buildings and they shake in fear. Monk fighters fly over the city and they gun down one of the robots. They gun down a few more robots. Ivan said, "I think we're in the safe." Ivan, Dirk, and Safron run out in the streets and they draw their swords. Ivan said, "We are the Ultraverse Monks and we are here to save you." Large legions of empire soldiers storm out into the streets and they surround Ivan, Dirk, and Safron. Safron said, "Where did the other monks go?" The empire troops take most of the monks and tie them and imprison them. The large robots gun down some of the Monk fighters in the sky until there are no more Monk fighters patrolling the skies. Dirk said, "Got any more plans?" Ivan said, "I thought they would have sent more experienced monks for something like this." Safron said, "This is what happens when Keith and Roswell go out on a long voyage to some obscure faraway universe." Dirk said, "I say we take matters into my own hands." Dirk goes and he takes combat against the troops. He fights off a large number of them. Ivan and Safron draw their swords and they fight off more of the troops. Civilians watch them and they cheer on the Monks.

Most of the troops get knocked down in defeat. Then they see a large cylinder ignite in the sky. The cylinder is chained to the city. The cylinder shines a beam of light down on the battleground street. Dark armored troops appear and they surround another Ivan. Ivan said, "Wait, there are two of me?" The other Ivan is larger and has black goth face paint. This Ivan also has a large metal arm and wears a t-shirt that has an asterisks rather than a yin-yang.

The robotic armed Ivan said, "The Asterisks Empire will unify the universes of this vast Ultraverse and will bring peace and equality to all the people in this Ultraverse." Ivan said, "And we Monks protect the Ultraverse from imposter freaks like you." Ivan jumps with his sword and the Dark Ivan grabs onto Ivan with his robotic arm and he smashes Ivan into the ground. Safron tries to take a swing at the Dark Ivan and Dark Ivan throws Ivan away and Safron duels Dark Ivan and Dark Ivan uses his robotic arm as a sword.

Ivan falls down the street and he lands next to a classic 40's car. Ivan uses his sword to break the lock on the car and he starts up the ignition. Safron and Dirk are trying to fight off Dark Ivan but Dark Ivan has the upper-hand on them. Dark Ivan grabs Dirk and Safron and he raises them high. Dark Ivan said, "You will now be subjugated by my forces like what we have done to your other Monk fools up there." Dark Ivan points to the lit cylinder in the sky. Ivan runs the 40's car into Dark Ivan and Dark Ivan drops Safron and Dirk and he uses his robotic arm to stop the 40's car. Ivan yells, "Get in!" Safron and Dirk jump in the 40's car and Ivan backs up and he zips away from Dark Ivan. Dark Ivan said, "Find them! We cannot let those Monks get away."

Ivan is driving down the street with Dirk and Safron in the 40's car. Ivan said, "How is it possible that there is another of me?" Safron said, "It is probably a different version of you from another universe." Ivan said, "I exist in other universes?" Safron said, "Just about everyone you know exists in several different universes. They often vary based on the differences of those universes." Dirk said, "I say we just give the Dark Ivan a good pounding and blow that thing in the sky and get out of here." Ivan said, "That might be challenging. It looks like the killer robots and Empire troops have taken all our Monk allies." Safron said, "The other Ivan mentioned something about the Monks being held in that cylinder in the sky." Ivan said, "That cylinder may be key to all this." The 40's car gets spotted by the giant killer robots and the giant killer robots chase after the 40's car. Ivan does some twists and turns down the street to avoid getting hit by the robots. A robot punches the road and Ivan twists out of the way and another robot punches another part of the road and the 40's car is thrown to its side and Ivan, Dirk, and Safron fall out of the car. The robots spot them and they run into some building that is a ballroom. People in fancy suits and dresses dance in the decadent room filled with glass sculptures, live orchestral music, and a giant glass chandelier on the ceiling. Ivan said, "I guess we just blend in." Ivan spots a briefcase filled with tuxedos. Ivan, Dirk, and Safron put on tuxedos and they grab drinks and they blend in with the crowd.

Dark Ivan barges into the place with Empire troops. The music stops and everyone stares at Dark Ivan. Dark Ivan said, "Where is he? There are Monks hiding here and any of those Monks pose a threat to our plan. There is one Monk in particular I am looking at. I know he is here." Dark Ivan walks around and looks closely at the people in the ballroom. Dark Ivan said, "Since no one is going to speak up, I guess I will have to take this matter into my own robotic arm." Dark Ivan snaps his robotic arm's hand and the Empire troops gun down the chandelier and it falls and everyone runs to the edges of the ballroom. Dark Ivan sweeps through the edges and he finds Ivan, Dirk, and Safron and he grabs them and lifts them with his large robotic arm. Dark Ivan said, "You didn't think you could hide from me like that, did you? You are coming with me." Dark Ivan brings, Ivan, Dirk, and Safron to the cylinder in the sky.

Dark Ivan shows Ivan, Dirk, and Safron around the cylinder. Dark Ivan said, "This cylinder was built by the great Asterisks Empire to subjugate the various worlds of the different universes of the Ultraverse. We also have our own means of subjugation for the subjects we capture. Dark Ivan shows Ivan, Dirk, and Safron, a factory room where Monks build gadgets and they work on building more giant killer robots. Dark Ivan said, "These Monks are finally serving a much better purpose." Ivan said, "When are you just going to throw us in prison?" Dark Ivan said, "Now, now, we don't have prisons in this cylinder. We just modify people we capture so they serve our bidding." Ivan said, "Are you really me from another universe?" Dark Ivan gives Ivan a stern look. Ivan said, "You look like me and I know there are other versions of me that exist in other universes." Dark Ivan said, "We are not the same person and we never will be." Ivan said, "What made you this way? What could have happened to you that would make you choose such a dark root?" Dark Ivan said, "My history is none of your concern?" Ivan said, "It was Figoni, wasn't it?" Dark Ivan said, "I don't know what you are talking about." Ivan said, "Figoni was a deranged principal of the high school we went to. He would go out of his way to specifically pick on us because we were chosen by some Ultraversal Force. We are the yin-yang chosen ones. That is why we have an obsession with the yin-yang. We were chosen for good. We were chosen to provide prosperity to the Ultraverse. This isn't what we were supposed to do. This is what Figoni would have wanted. You don't want to serve Figoni, right?" A surge of flashbacks and thoughts fly through Dark Ivan's mind. Dark Ivan yells, "Troops!" Troops show up. Dark Ivan said, "Have these Monks subjugated." The troops bow and they grab onto Ivan, Dirk, and Safron and they are brought to a factory room where robotic parts are going to be built into them. Dark Ivan watches over the process.

A door opens to the hall Dark Ivan is watching and Figoni enters the hall with the window view. Figoni said, "Ivan. I am glad you became what you became. My goal was to show that Ivan and his punk friends that it never pays to defy what society wants from us. I am proud of you, Ivan. You have done a great service for me. I only downplayed your skills so you would become more serious about your life's decisions.

Now that the Monk Ivan and his Monk friends are on our side now, I guess I have won. I have stopped the yin-yang chosen one from becoming the greatest hero in the Ultraverse and now we can begin with our additional invasion plans.” Dark Ivan said, “What plans?” Figoni said, “Don’t you know? This base is also a weapon. It is cylindrical because it can be used as a rolling pin to crush and flatten the worlds below so there will be no traces of civilizations before our empire conquered them.” A surge of hatred flies through Dark Ivan. Ivan, Dirk, and Safron scream in fear as they are going to have robotic parts placed into them. Dark Ivan uses his robotic arm to smash the glass and he jumps down and he smashes off all the robots and equipment in the place and he smashes and destroys the robotic arms that were going to place robotic parts into Ivan, Dirk, and Safron. Safron said, “Other Ivan, I knew you would make the right decision.” Dark Ivan said, “You are right. This is just a plot from Figoni. He has a plan to crush the city below us. It is not too late to do something about it.”

Both Ivans, Dirk, and Safron rush out of the factory and Dark Ivan breaks through security doors and they get to the main control room where Figoni takes control of the cylinder. Figoni presses a button and it undoes the chain connecting the cylinder to the city below. Figoni controls the cylinder so it can flatten the city below. Ivan said, “You lose, Figoni. I have defeated you once before and I will gladly defeat you again.” Figoni said, “I am better than that. I can defeat the two Ivans easily.” The cylinder descends to the city and Empire troops enter the control room. Dirk and Safron fight off the troops and both Ivans jump toward Figoni. Figoni blocks both Ivans with strong metal armor built into his body. Figoni said, “You didn’t think I would make any version of Ivan stronger than myself, did you? I have been playing you this whole time, Ivan. You were set up to find that portal and to find this great Empire. We needed you to conquer all those universes.” Dark Ivan said, “You will fail.” Dark Ivan grabs onto Figoni and he drags him all over the controls in the control room. Dark Ivan grabs Figoni and throws him to the other end of the room. Ivan sees the cylinder is going to fall to the city. It is getting closer and closer. Ivan plays with the controls and he figures out how to control the cylinder and he makes it go further and then he pulls on the control yoke and he makes it fall into the water. All the systems on the cylinder fail. The Monks in the robot factory stop making robots and they become themselves again. The cylinder starts filling up with water.

Dark Ivan breaks a hole to the top of the cylinder and the monks climb out. The cylinder is drifting away from the land. Dirk said, “Are we going to sink out here in the middle of the ocean?” Dark Ivan said, “Was I redeemed for nothing?” A portal opens and Keith and Roswell are at the controls of a large Monk transport. The transport hovers over the cylinder and the Ivans and the Monks jump into the transport. Just as Dark Ivan is going to the transport, Figoni rises and grabs onto Dark Ivan’s leg. Figoni said, “You are not getting away that easy.” Roswell hovers around Figoni with Keith on

Roswell's back. Keith jumps and he smashes Figoni with his cyan sword and Figoni and Keith fall into the ocean. Roswell grabs Keith and brings him to the transport.

Both Ivans, Dirk, and Safron take a seat in the transport. Safron said, "I am proud of you, other Ivan. I love anyone that is supposed to be Ivan. We are supposed to meet and become an awesome duo but the Ivans are from the universes and I am from the Ultraverse. There is only one known version of me unless there are other Ultraverses." Ivan said, "You should join the Ultraverse Monks. You would make an awesome addition to our clan." Dark Ivan said, "Thanks but I have scores to settle with other universes. Since I helped take over innocent worlds, I think it is only fair that I help fight this Empire and make sure it never rules the Ultraverse." Ivan said, "We will help you with that. This Empire seems very powerful and it is the responsibility of the Ultraverse Monks that we fight and defend the universes from interuniversal threats." Dark Ivan said, "Thanks." Keith said, "This Empire has taken a great toll even in the faraway Ultraverses. It looks like we got back at the perfect time."
